Director, Hebrew University Autism Center

Sponsored by:

Beth Judea  
Israel Committee

March 16, 2017, 8 PM  
Congregation Beth Judea  
5304 RFD, Long Grove IL 60047

*Prof. Cory Shulman has more than thirty years of clinical work with individuals with autism spectrum disorder (ASD). Her primary appointment is in the graduate program in Early Childhood Studies, in which she is the head of the infant and early childhood mental health tract specialization. Her research interests focus on young children with neurodevelopmental disorders and their families. In particular, she is interested in the course of development of autism over time, using observational, psychometric and interview measures of communication, social interaction, play and imitation. Prof. Shulman is the Director at the newly established Autism Center at the Hebrew University, a multidisciplinary research and training institute.*
